

Embark on a transformative journey with the third edition of the Youth Climate LAB: “How to integrate Traditional Ecological Knowledge (TEK) into learning communities”!

What's the Youth Climate LAB?

It's a vibrant peer-learning experience where YOU can explore climate-related challenges, brainstorm innovative and practical solutions, and present them to stakeholders who can bring your ideas to life. In this season, we're zooming in on the fascinating intersection of Traditional Ecological Knowledge (TEK) and climate action change within educational settings in learning communities.

What's in store?

As a participant, you'll:

- Engage with peers and experts in five interesting sessions in September 2025.
- Collaborate with experts to master the topic and co-design a pilot learning scenario and 5 practical recommendations that marry traditional ecological knowledge with climate initiatives in schools.
- Receive a **certificate of completion**, issued only if you have actively joined the discussions.

Mark your calendars!

The sessions will run from **Monday 15 September to Saturday 20 September**. Two representatives will be selected to present the outcomes during the Education for Climate Day on 23 October 2025.

Who are we looking for?

- You are **between 16 and 26 years old** eager to invest time and passion in exploring traditional ecological knowledge and climate education.
- You are a citizen of one of the countries of the European Education Area.
- You have sufficient understanding of **English** to actively participate in discussions.

How to join?

Scan the code and fill in the **form by 31 August 2025** to submit your application!
