2025 Edition of the PhD Autumn School
in Security, Risk and Vulnerability
Insights from the RETURN project

■ September
22 to 26, 2025

■ Annunziata convent,
Bay of Silence in Sestri
Levante (Liguria – Italy)

5-day intensive PhD Autumn School targeted to Civil and Environmental Engineering PhD candidates, post-doc researchers and early-career scientists working on **seismic and flood risk at urban scale**, who are interested in broadening their knowledge through a **multi-risk approach!**

Thanks to distinguished **international speakers** and the **RETURN partnership**, participants will have the opportunity to delve into key open challenges in the multi-risk perspective through **cross-cutting sessions**, and to explore the **latest advances** in seismic and flood risk in dedicated **parallel sessions**.

No registration fee!

Pre-registration is open until
July 15, 2025 – maximum
number of participants: 35!!
